

rightTM Kit

*Shown with Mission Spec EOCTM Plate Carrier

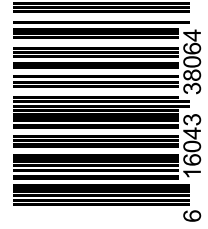

The Mission Spec **Rigit**TM acts as an interface between a standard PALS (MOLLE) grid and any chest rig or panel that utilizes industry standard buckles for vertical attachment (ITW GTSR and DuraFlex Mojave patterned buckles). The **Rigit**TM also offers a stable loop base to reduce or eliminate movement of the attached piece if your rig of choice has a hook backing.

Specifications

- A-A-55301 Spec Webbing.
- A-A-55126 Spec Hook and Loop.
- Mil-Spec and Berry Compliant (See: Berry Amendment USC, Title 10, Section 2533a).
- 100% U.S.A. Produced.
- Limited Lifetime Warranty.

Coyote

Demonstration Video

Step 1

Insert the **Rigit**TM strips into the PALS grid of your plate carrier with the **Rigit**TM label facing the carrier.

Demonstration Video

Step 2

Fold each strip over allowing the **Rigit**TM to adhere to itself via the hook and loop. Tuck the remaining hook tail, into the PALS grid at the bottom, securing it to the rest of the **Rigit**TM strip.

Step 3

Attach your rig or panel of choice to the two hanging **ITW QASM**TM buckles.

*Shown with **Mission Spec EOC**TM and **Haley Strategic Partners D3CR**TM.
